# Spectral KLAR 555

Two-component clearcoat with increased scratch resistance (SR)

#### **RELATED PRODUCTS**

Spectral KLAR 555 Spectral H 6115 Spectral SOLV 855

Spectral PLAST 775 Spectral S-D10 Spectral EXTRA 895 SR clearcoat
Hardener: Fast, Standard, Slow, Extra Slow
Standard, fast, slow and extra slow acrylic
thinners
Elasticity increasing agent
Matting additive
Fade out Thinner

#### **PROPERTIES**

- Increased scratch resistance (SR)
- HS technology high solid content
  - Perfect levelling
  - High final hardness
  - Increased chemical resistance

### Spectral KLAR 555

Technical data sheet 12.12.2019

DRYING TIMES				
	H 6115 standard			
	20 °C	60 °C		
Dust-free	35 min.	5 min.		
Tack-free	4 hours	10 min.		
Polishability (operating hardness)	14 hours	45 min.*		
Final hardness	7 days	45 min. + 1 day/20 °C		

CAUTION: The curing times apply to the temperatures of the individual elements. The cabin temperature should be approximately 10°C higher. Drying the clearcoat with a fast hardener at an increased temperature can reduce the gloss. A coat cured at a temperature of 60 °C reaches a higher final hardness than a coat cured at 20 °C \*polishability after cooling down the element.

# RELATED PRODUCTS, DEPENDING ON THE PROCESSING TEMPERATURE 15 - 20°C 20 - 25°C 25 - 35°C + 35°C Spectral H 6115 Fast Standard Slow Extra Slow Spectral SOLV 855 Fast Standard Slow Extra Slow

#### **DRYING WITH AN INFRARED RADIATOR**

|--|

Distance

Time depending on the type and power of the lamp

Follow the recommendations of the equipment manufacturer

10 ÷ 25 min.

CAUTION: Use the radiator no sooner than 10 min. after applying the last layer.

#### Spectral PLAST 775 ELASTICITY INCREASING AGENT

To increase the paint coating's elasticity on plastic elements or to increase the coating's resistance to stone chipping (e.g. front strip, bonnet), add 10 + 30 % (vol.) of Spectral PLAST 775 per ready to apply mixture (Spectral KLAR 555\* with Spectral H 6115).

\* the provided quantity of Spectral PLAST 775 does not apply to coats with a mat effect

#### **Spectral S-D10 MATTING ADDITIVE**

Depending on the desired gloss, the additive can be used in a quantity of  $70 \div 100$  % vol. per coat (without the hardener). Its use influences the mixture's viscosity, which should be taken into account when using a thinner. Add the hardener only in a quantity per Spectral KLAR 555.

Volume ratio %	Gloss		
70	semigloss		
100	matt		

#### Spectral EXTRA 895 FADE OUT THINNER

Spectra EXTRA 895 fade out thinner should be applied in thin layers, in 1-2 passes, to the contact area between old paint coating and the newly-applied coat.

Two working methods may be used:

Method I (recommended): Apply a thin layer of fade out thinner immediately after each layer of clear coat is applied.

Method II: Apply a thin layer of fade out thinner immediately after the final layer of clear coat is applied.

#### **EQUIPMENT CLEANING**

SOLV 855 acrylic thinner or NC solvent.

#### STORAGE CONDITIONS

Store in a dry and cool place, away from sources of fire and heat. Avoid direct exposure to sunlight.

#### SHELF LIFE

Spectral KLAR 555	24 months/20 °C
Spectral H 6115	12 months/20 °C
Spectral SOLV 855	24 months/20 °C
Spectral PLAST 775	24 months/20 °C
Spectral S-D10	24 months/20 °C
Spectral EXTRA 895	24 months/20 °C

#### **SAFETY**

See Safety Data Sheet.

#### **OTHER INFORMATIONS**

Registration number: 000024104.

The effectiveness of our systems results from laboratory research and many years of experience. The data contained herein meets the current knowledge about our products and their application potential. We ensure high quality, provided the user follows the instructions and the work is performed in accordance with good workmanship. It is necessary to do a test application of the product due to its potentially different reaction with different materials. We may not be held liable for defects if the final result was affected by factors beyond our control.
